HIGHCARE™

Adhesive Skin Closure Strips · 13 mm × 100 mm

Professional Skin Closure Solution for Surgical Incisions & Wound Approximation

HIGHCARE™ Skin Closure Strips are adhesive medical strips designed to help approximate and support the edges of suitable superficial wounds and skin incisions.

Used in appropriate clinical situations across surgical incisions, minor lacerations, wound support, and support following suture or staple removal — in emergency departments, outpatient procedures, day surgery, and appropriate plastic and cosmetic surgical applications.

REF HC19068 · EO STERILIZED · SINGLE USE DEVICE · CE MARKED

> Use should be based on clinical assessment and the official product IFU.

STRIPS / POUCH	POUCHES / BOX	STRIPS / BOX	MM · STRIP SIZE

WHY SKIN CLOSURE STRIPS?

No Needle
No needle puncture is required during strip application.

Fast Application
Simple application process when clinically appropriate.

Patient-Friendly
A non-invasive alternative for suitable superficial wound closure.

Low Profile
Slim adhesive strip design suitable for skin closure applications.

Not intended to replace sutures or staples in every wound. Clinical suitability should be determined by a qualified healthcare professional.

Product Specifications

Designed for Professional Medical Use

SPECIFICATION TABLE

Brand	**HIGHCARE™**
Product	**Skin Closure Strips**
Description	**Adhesive Wound Closure Strips**
REF	**HC19068**
Size	**13 × 100 mm**
Strips / Pouch	**6**
Pouches / Box	**50**
Total Strips / Box	**300**
Sterilization	**EO**
Device Category	**Skin / Wound Closure**
Manufacturer	**Shanghai ISO Medical Products Co., Ltd.**
Country of Manufacture	**P.R. China**
EC Representative	**Lotus NL B.V.**

TRACEABILITY

UDI	**(01) 36937935329973**
Lot	**250102**
Manufacturing Date	**2025 / 01 / 06**
Expiry Date	**2030 / 01 / 05**
Shelf Life	**5 Years**

Product identification and lot information support inventory management and traceability across the procurement and distribution chain.

PACKAGING FLOW

1 Pouch	→	**6 Strips**
50 Pouches	→	**1 Box**
1 Box	→	**300 Strips**

Shipping Configuration

Strips / Card	**3**
Cards / Bag	**2**
Strips / Bag	**6**
Bags / Box	**50**
Boxes / Mini Carton	**4**
Mini Cartons / Carton	**4**
Boxes / Master Carton	**16**
Strips / Master Carton	**4,800**

STORAGE

- Store in a dry environment.
- Protect from direct sunlight.
- Avoid excessive heat.
- Maintain package integrity.
- Do not use if sterile packaging is damaged or opened.

Clinical Applications

A Practical Solution for Appropriate Skin Closure

APPLICATION AREAS

Surgical Incisions
For appropriate skin incisions according to clinical assessment.

Minor Lacerations
For suitable superficial cuts and lacerations.

Wound Support
For supporting wound edges during healing when clinically appropriate.

Post Suture / Staple
Supporting the wound after suture or staple removal when recommended.

Emergency Dept.
A practical option for appropriate superficial wound closure.

Outpatient & Day Surgery
Suitable for use where adhesive skin closure is clinically appropriate.

Plastic & Cosmetic
Can be considered for suitable incisions per surgeon assessment.

Clinical Assessment
Final suitability always follows the official IFU and clinician judgement.

HOW IT WORKS

1. **Prepare**
   Clean and dry the surrounding skin according to the applicable clinical protocol.
2. **Approximate**
   Bring the wound edges together appropriately.
3. **Apply**
   Apply the strip across the wound while maintaining appropriate approximation.
4. **Support**
   The strips help maintain approximation of the skin edges during the healing period.

KEY BENEFITS FOR HOSPITALS

1. **Faster Workflow**
   Simple strip application can support efficient clinical workflow in appropriate cases.
2. **Patient-Friendly**
   No needle puncture is required during strip application.
3. **Cost-Conscious**
   A value-oriented option for institutions optimizing wound-closure procurement costs.
4. **Convenient Packaging**
   6 strips per pouch and 50 pouches per box support organized clinical inventory.

Important Clinical Note. HIGHCARE™ Skin Closure Strips should not be presented as a universal replacement for sutures or staples. Clinical suitability depends on wound depth, tension, location, skin condition, contamination or infection, patient condition, moisture, friction, and overall clinical assessment. Not indicated for infected, heavily contaminated, high-tension, deep, or otherwise inappropriate wounds.

Manufacturer & Quality

Manufactured for Professional Healthcare Supply

MANUFACTURER

Shanghai ISO Medical Products Co., Ltd.

999 Liu Chen Rd., Pudong New Area, Shanghai, P.R. China

Shanghai ISO Medical Products Co., Ltd. is the manufacturer identified on the product packaging and associated technical documentation, covering medical device manufacturing, wound care product categories, skin closure products across multiple sizes, institutional supply, and product traceability.

> **ISO 13485:2016** — subject to current certificate verification for the applicable manufacturing site and product.

REGULATORY MARKINGS

A COST-EFFECTIVE ALTERNATIVE TO PREMIUM BRANDS

3M™ Steri-Strip™ represents a well-established premium benchmark in the skin closure strip category. 3M offers reinforced skin closure products in sizes close to HIGHCARE's 13 × 100 mm configuration — for example, a 3M reinforced skin closure product at approximately 12 × 100 mm. HIGHCARE™ HC19068 is designed to provide a cost-conscious alternative within the professional skin closure category.

CATEGORY	HIGHCARE HC19068	PREMIUM BRANDS (E.G. 3M)
Product Type	Skin Closure Strip	Skin Closure Strip
Size	13 × 100 mm	Similar sizes available
Individual Packaging	6 Strips / Pouch	Varies by SKU
Sterility	EO Sterilized	Varies by SKU
Medical Device	Yes	Yes
Manufacturer	Shanghai ISO Medical Products Co., Ltd.	3M
Brand Position	Value / Cost-Efficient	Premium
Procurement Position	Institutional cost efficiency	Premium brand positioning

Comparison for general category reference only. Not a claim of identical construction, performance, or clinical outcome. Pricing available on request; no equivalence to 3M is stated or implied.

HIGHCARE™

Professional Skin Closure. Smarter Procurement.

A professional skin closure solution designed for hospitals, clinics, distributors and healthcare procurement organizations seeking reliable supply and cost efficiency.

WHY CONSIDER HIGHCARE

1. **Competitive Total Cost**
   A value-oriented option for institutions seeking to optimize procurement expenditure.
2. **Professional Packaging**
   Individual sterile pouches support controlled clinical use and organized inventory.
3. **Multiple Sizes Available**
   Available across multiple sizes, subject to availability and official documentation.
4. **Established Manufacturer**
   Manufactured by Shanghai ISO Medical Products Co., Ltd.

HIGHCARE PRODUCT RANGE

SIZE	APPLICATION	PRICE / BOX (SAR)
6 × 75 mm	**Smaller closure applications**	~~90 SAR~~ **70 SAR**
6 × 100 mm	**Standard closure applications**	~~110 SAR~~ **80 SAR**
13 × 100 mm	**Wider skin support / incisions**	~~85 SAR~~ **75 SAR**
25 × 100 mm	**Wider support applications**	~~100 SAR~~ **80 SAR**

Prices shown are the current offer (previous price struck through).
Final application and product selection must follow the official IFU and clinical assessment.

Professional Skin Closure Solutions — Built for Healthcare Procurement.

HIGHCARE™ offers hospitals, clinics, distributors and healthcare suppliers a practical opportunity to source sterile skin closure products with professional packaging, traceability and competitive procurement economics. HC19068 provides 6 sterile closure strips per pouch and 50 pouches per box, delivering 300 strips per box — an efficient configuration for hospital and distributor procurement.
